

Conveying Components Group Announces Acquisition of PEBCO, Inc.

Acquisition expands CCG's material handling capabilities and strengthens its growing family of manufacturing brands.

OVERLAND PARK, KANSAS — Conveying Components Group (CCG), a leading provider of material handling and conveying components, today announced that it has successfully completed the acquisition of substantially all of the operating assets of PEBCO, Inc., a specialized manufacturer of dry bulk material handling equipment and technologies based in Paducah, Kentucky.

Financial terms of the private transaction were not disclosed.

The acquisition directly supports CCG's long-term growth strategy of building a strong family of recognized brands and expanding its manufacturing capabilities to serve customers across a broad range of material handling applications and industries.

*"We are excited to welcome the PEBCO team into the CCG family," said **Tony Thill, President & CEO of Conveying Components Group**. "This acquisition furthers our vision of becoming the leading provider of components for our customers' material handling and conveying applications. PEBCO brings complementary products and technologies to CCG, including loading equipment and solutions for the flow, direction and metering of dry bulk solids, further expanding what we can offer our customers."*

Dave Finke, President & COO of PEBCO, added, *"Becoming part of the CCG family of companies is a natural next step toward growing the market for our products and technologies while continuing to serve our customers around the world."*

PEBCO brings decades of experience in dry bulk material handling to CCG, with an extensive product portfolio that includes slide gates, rolling blade gates, valves, diverters, mass flow feeders, fluidized conveyors, dustless loading spouts, telescopic chutes and other specialized technologies.

With the addition of PEBCO, Conveying Components Group now brings together four specialized manufacturing brands — PEBCO, Lorenz Conveying Products, JL Components and Sasquatch Mills — providing customers with an increasingly comprehensive range of products and expertise for material handling and conveying applications.

About Conveying Components Group

Conveying Components Group (CCG) is the comprehensive provider of material conveying components in North America. Through its family of specialized companies — PEBCO, Lorenz Conveying Products, JL Components and Sasquatch Mills — CCG provides products, manufacturing expertise and solutions for material handling and conveying applications across a broad range of industries.

Together, the CCG companies provide complementary capabilities spanning pneumatic conveying components, dry bulk material handling equipment, blower packages and related equipment, and milling equipment.

Conveying Component Solutions Designed To Meet Your Toughest Challenges.

BellMark Partners LLC, and Calfee, Halter & Griswold LLP, both of Cleveland, Ohio, advised seller in the transaction.
